

EQWOOLS™ CHEMICAL PARTNERS CONTACTS

Working with eqwools™ Dyes and Chemicals

Getting the Best Results from the Start

This list of chemicals and dyes includes those that we know work successfully with eqwools™, based on industry use and dye house trials.

While comprehensive, this is **not an exhaustive list** — there are other formulations and partners that may also work effectively.

We're here to help.

If you're working with different dye systems or need support setting up a new process, **please contact us to arrange a technical meeting.**

Our team (info@eqwools.com) and Mark (Mark.Dunstan@michell.com.au) are available to assist, share additional data, and help you achieve consistent, high-quality results.
